PROFESSIONAL SUMMARY

Hands-on iOS engineering lead with 9+ years of software development experience across e-commerce, ride-sharing, real-time communication, and mobile games. Builds native applications with Swift, SwiftUI, and UIKit; designs modular architectures; and mentors mobile engineers. Experience includes Daraz (Alibaba Group), leadership of an 8-engineer team, and independently developed App Store products Expense Packet and Talk Trial.

TECHNICAL SKILLS

iOS development: Swift, SwiftUI, UIKit, Combine, SwiftData, Swift Package Manager (SPM)

Architecture and delivery: MVVM, modular architecture, system design, unit testing, Git, CI/CD

Specialist technologies: Vision OCR, AVFoundation, Speech, StoreKit 2, Foundation Models, WebRTC, XMPP

Leadership: Technical roadmaps, mentoring, code reviews, cross-platform team coordination

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Nasir Syntax Solution Ltd.

May 2024 - Present | Dhaka, Bangladesh

- Lead iOS and Android engineers delivering ride-sharing and e-commerce applications, combining hands-on iOS development with architecture and delivery oversight.
- Design modular mobile solutions and real-time ride-sharing flows spanning parcel delivery, messaging, and bidding-based fare negotiation.
- Develop e-commerce capabilities including product catalogs, checkout, payment integrations, and augmented reality experiences.
- Establish CI/CD pipelines and support engineering growth through mentoring, one-to-one meetings, and performance reviews.

Lead Engineer, iOS | Easital Technologies Ltd.

May 2023 - Apr 2024 | Dhaka, Bangladesh

- Supported 8 engineers through technical guidance and internal assessments; helped 2 team members progress into senior leadership roles.
- Set quarterly technical roadmaps and guided modularization of a multi-service application spanning payments, ride-sharing, food delivery, and commerce.
- Collaborated with backend engineers to design an XMPP messaging system and align mobile and backend architecture.

Senior Software Engineer, iOS | Daraz - Alibaba Group

Mar 2022 - Apr 2023 | Dhaka, Bangladesh

- Developed and optimized features for the Daraz shopping application, collaborating on data-informed improvements to the customer experience.
- Proposed system design improvements to simplify feature delivery and reduce application development costs.

PROFESSIONAL EXPERIENCE CONTINUED

Software Engineer, iOS | Live Technologies

Nov 2019 - Feb 2022 | Dhaka, Bangladesh

- Introduced application caching that reduced API costs by 30%.
- Built real-time messaging capabilities and a custom WebRTC video-calling SDK to reduce reliance on third-party services.
- Implemented indoor navigation using real-world coordinates and contributed to mobile products in telemedicine, education, sports, and food delivery.

Game Developer | Pechas Game Studios

Jul 2017 - Oct 2019 | Dhaka, Bangladesh

- Developed mobile applications and games for iOS and Android, including the Goli Cricket 3D multiplayer game for Facebook Instant Games.
- Built a native game engine for a lightweight gaming application, reducing application size by 50% against the Unity-based implementation.

SELECTED PROJECTS

Daraz | Alibaba Group | E-commerce

Contributed to the Daraz iOS shopping app as a Senior Software Engineer. Developed and optimized shopping features, supported data-informed product decisions, and proposed system design improvements to simplify delivery.

Expense Packet | Independent iOS Product

Built and published a SwiftUI app with SwiftData persistence, Vision OCR, PDFKit, and StoreKit 2. Converts receipts into numbered PDF reimbursement packets and matching CSV exports, with multi-currency handling and confidence-based review. Isolated extraction, reporting, backup, and purchasing in a Swift 6 package with Swift Testing coverage.

Talk Trial | Independent iOS Product

Built and published a SwiftUI speaking-practice app using AVFoundation, Speech, Combine, Swift Charts, and StoreKit 2. Implemented word-synced playback, filler-word detection, live haptic coaching, and subscription entitlements. Integrated on-device Foundation Models for follow-up questions on supported devices, with a rule-based fallback.

Beeda and Beeda Merchant | Multi-service Commerce

Contributed to a multi-service mobile platform and its merchant companion. Worked on application modularization and features for commerce, orders, and business operations.

HungryNaki | Food Delivery

Redesigned the application interface and user experience for a food delivery product, contributing to a 20% increase in orders.

EDUCATION

Bachelor of Science in Software Engineering

Daffodil International University | 2017
